10shaliniworkspace@gmail.com

PROFESSIONAL SUMMARY

Aspiring cybersecurity student with a strong interest in defensive security and SOC operations. Building a solid foundation in networking, operating systems, and core security concepts. Actively developing skills in threat detection, system monitoring, and incident response through hands-on learning and practical exploration.

PROJECTS

FIMS – File Integrity Monitoring System

- Frontend – HTML5, CSS, JavaScript

A File Integrity Monitoring System (FIMS) uses SHA-256 hashing to create a unique digital fingerprint of a file. It allows users to verify file authenticity, and any unauthorized modification is instantly detected by comparing hashes.

DecepNet

- Frontend – React, HTML, CSS

A network of decoy honeypot servers that report to a central server, which correlates activity across nodes to detect coordinated attacks.

SKILLS

Technical Skills

- Networking Basics
- Cybersecurity concepts
- Python programming (basics)
- C programming (basics)

Soft Skills

- Problem-solving,
- Documentation,
- Creativity,
- Team work

Tools

- Cyberchef
- Virustotal
- Wireshark

EDUCATION

NPR College of Engineering & Technology

B.E. CSE (Cybersecurity)
CGPA: 9.38

2025 – 2029

Prasiddhi Vidyodaya Senior Secondary School

Computer Science Stream
percentage – 73%

2023 – 2025

CERTIFICATIONS

- Introduction to Cybersecurity course from CISCO
- Introduction to Network Analysis
